4 HOUSING DEVELOPMENT FUND

The Housing Development Fund was established in terms of the Housing Act, (Act No 107 of 1997). The proceeds of erven sold were allocated to the Erven Trust Fund. The funds are transferred from Erven Trust Fund to Housing Development Fund with the implementation of GAMAP. METSIMAHOLO LOCAL MUNICIPALITY
ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR
THE YEAR ENDED 30 JUNE 2007

In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

5 RESERVES

5.1 *Capital Replacement Reserve (CRR)*

The account was the Asset Financing Reserve in 2003/2004 Financial Statements. In order to finance the provision of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR in terms of a Council resolution (Budget approval). A corresponding amount is transferred to a designated CRR investment account. The cash in the designated CRR investment account can only be utilized to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) are credited by a corresponding amount when the amounts in the CRR are utilized.

The amount transferred to the CRR is based on the municipality's need to finance future capital projects included in the Integrated Development Plan.

Including in the Capital Replacement Reserve there are the following three reserves electrical, water and sewerage network strengthening. These funds are financed by public contributions. The funds can be used for operating and capital expenses on the above networks.

5.2 *Capitalisation Reserve*

During 2003/2004 the account was Future Depreciation Reserves : AFR. On the implementation of GAMAP/GRAP, the balance on certain funds, created in terms of the various Provincial Ordinances applicable at the time, that had historically been utilized for the acquisition of items of property, plant and equipment have been transferred to a Capitalisation Reserve instead of the accumulated surplus/(deficit) in terms of a directive (budget circular) issued by National Treasury. The purpose of this Reserve is to promote consumer equity by ensuring that the future depreciation expenses that will be incurred over the useful lives of these

items of property, plant and equipment are offset by transfers from this reserve to the accumulated surplus/(deficit).

METSIMAHOLO LOCAL MUNICIPALITY
ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR
THE YEAR ENDED 30 JUNE 2007

The balance on the Capitalisation Reserve equals the carrying value of the items of property, plant and equipment financed from the former legislated funds. When items of property, plant and equipment are depreciated, a transfer is made from the Capitalisation Reserve to the accumulated surplus/(deficit).

When an item of property, plant and equipment is disposed, the balance in the Capitalisation Reserve relating to such item is transferred to the accumulated surplus/ (deficit).

6 PROPERTY, PLANT AND EQUIPMENT

2006/07 accounting policy regarding property, plant and equipment transactions agree with that applied in the 2005/06 financial year, in accordance with the exemptions in Gazette no. 30013 of 29 Jun'07.

Property, plant and equipment, is stated at cost, less accumulated depreciation, land and buildings. Heritage assets, which are culturally significant resources and which are shown at cost, are not depreciated owing to the uncertainty regarding their estimated useful lives. Similarly, land is not depreciated as it is deemed to have an indefinite life.

The cost of an item of property, plant and equipment acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets was measured at its fair value. If the acquired item could not be measured at its fair value, its cost was measured at the carrying amount of the asset given up.

Subsequent expenditure is capitalized when the recognition and measurement criteria of assets are met.

Depreciation is calculated on cost, using the straight-line method over the estimated useful lives of the assets. The annual depreciation rates are based on the following estimated asset lives:-

Liquidity risk

The Council's risk to liquidity is a result of the funds available to cover future commitments. The Council manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared monthly and adequate utilised borrowing facilities are monitored. The Council has a R 5 million overdraft facility with ABSA BANK to ensure adequate borrowing facilities are available. The cash flow of the Council is managed on a daily basis and any problems are communicated to the management in time to ensure arrangements with major suppliers can be reached. The cash flow of the Council was placed under pressure due to an unforeseen problem in the form of a sudden abnormal level of unaccounted for water. The situation was managed and Council took drastic action to improve the matter.

The general liquidity of the Council is managed by a bank and investment policy with properly defined duties and responsibilities supported by adequate delegated authority by the Council.

The exposure of Council risk to liquidity due to the non payment of debtors are managed by ensuring that adequate deposits are required by consumers.

The Council has the following financial instruments that can be cashed in on a very short notice to relieve cash flow matters that cannot be addressed in the normal course of business.

Paid up annuity
 Shares SANLAM LTD
 Non paid up annuity
 Approved additional credit facility available

The above instruments are available if the current funds are not enough to cover the future commitments and are sufficient to cover any normal liquidity risk of the Council.

The Council is empowered to perform tariff adjustments and budget for any unforeseen operational changes in the nature of the Council business subject to applicable regulations.

(Upper and Lower Vaal Dam) The Council has established a disaster management committee and forum to ensure any disaster can be managed. The main bulk services for the area is purchased and these resources are negotiated through a national negotiation forum that ensure that bulk service purchase price increases are fair. The sewer purification for the Sasolburg and Zamdela services is purchased from SASOL group. The annual price increase is forwarded to the consumers to ensure that financial risks is managed. No joint or separate responsibility for sewer outfall exist on the Sasolburg and Zamdela plant.

The Council reviews its water and sewer purification prices annually, considering the need for active financial risk management.

The Council operates three demarcated refuse removal sites. The operation of these sites are considered adequate and current studies are underway to ensure that the sustainability, operation and rehabilitation of these sites are adequate. These studies will ensure that adequate financial risks is identified and managed.

The financial risk for storm water is managed through the non acceptance of any risk for down flow storm water in title deeds and the inclusion of operational and financial risk controls in the title deeds of all stands and the town planning scheme.

Adequate (R 100m) public liability insurance is secured annually from the insurers of the Council.

Problems are experienced with the asset register to be in line with GAMAP.

1. Depreciation is done with implementation of Asset Register, but further adjustments will be made to correct depreciation on the assets taken up
2. Loans redeemed and other capital receipts were allocated to accumulated depreciation, as well as Loan Redemption Fund.
