Annual Financial Statements for the year ended 30 June 2013

# Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2014 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for auditing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented on page x.

The annual financial statements set out on the accounting officer on 31 August 2013 ar	page x-x, which have been prepared on the going concern basis, were approved but were signed on its behalf by:
Municipal Manager SM Molala

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies are disclosed below.

These accounting policies are consistent with the previous period, except for the changes set out in note 45 Changes in accounting policy.

#### 1.1 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

#### Receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to balances in the portfolio and scaled to the estimated loss emergence period.

## Impairment testing

The recoverable (service) amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the historical outcomes indicate future outcomes assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including level of risk, location, arrangements, supply demand, together with economic factors such as inflation and interest.

## **Provisions**

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 13 - Provisions.

## Useful lives of property, plant and equipment and other assets

The municipality's management determines the estimated useful lives and related depreciation/amortisation charges for property, plant and equipment and other assets. This estimate is based on the pattern in which an asset's future economic benefits or service potential are expected to be consumed by the municipality.

#### Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.1 Significant judgements and sources of estimation uncertainty (continued)

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. The most appropriate discount rate that reflects the time value of money is with reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with a sufficiently long maturity to match the estimated maturity of all the benefit payments, the municipality uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 14 - Employee benefit obligations.

#### Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

#### Allowance for debt impairment

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivables' carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

#### 1.2 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services; or
- administrative purposes; or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired at no cost or for a nominal cost, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### Cost model

Subsequent to initial measurement investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal instalments over the useful life of the property, which is as follows:

ItemUseful lifeProperty - landindefiniteProperty - buildings25 years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

The gain or loss arising from the derecognition of investment property is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the investment property. Such difference is recognised in surplus or deficit when the investment property is derecognised.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.2 Investment property (continued)

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

#### 1.3 Property, plant and equipment

Property, plant and equipment are tangible non-current assets that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost or fair value of the item can be measured reliably.

Property, plant and equipment are initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at the date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the municipality is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Subsequent to initial measurement property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.3 Property, plant and equipment (continued)

The useful lives of items of property, plant and equipment have been assessed as follows:

Item Av	erage useful life
Buildings 50	years
Leasehold property 3 -	9 years
Plant and machinery 3 -	15 years
Furniture and fixtures 3 -	30 years
Motor vehicles 3 -	20 years
Office equipment 3 -	10 years
Infrastructure 5 -	50 years
Other property, plant and equipment 2 -	5 years

The residual value, the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the municipality to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item. Such difference is recognised in surplus or deficit when the item of property, plant and equipment is derecognised.

Compensation from third parties for an item of property, plant and equipment that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

## 1.4 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

## 1.5 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, excluding rights granted by statue, regardless whether those
  rights are transferable or separate from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale;
- there is an intention to complete and use or sell it:
- there is an ability to use or sell it;
- it will generate probable future economic benefits or service potential;
- there are available technical, financial and other resources to complete the development and to use or sell the
  asset; and
- the expenditure attributable to the asset during its development can be measured reliably.

Subsequent to initial measurement intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

ItemUseful lifeComputer software5 years

Intangible assets are derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss from the derecognition of an intangible asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the intangible asset. Such difference is recognised in surplus or deficit when the intangible asset is derecognised.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.6 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

#### Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value can be measured reliably.

Where the municipality holds a heritage asset, but on initial recognition, it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note 6 - Heritage assets.

#### Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at the date of acquisition.

#### Subsequent measurement

Subsequent to initial measurement heritage assets are carried at its cost less any accumulated impairment losses.

#### Impairment

The municipality assesses at each reporting date whether there is an indication that a heritage asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

## Derecognition

Heritage assets are derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

## 1.7 Controlled entity

The Metsimaholo Local Municipality (parent) controls Mayoral Trust (subsidiary).

#### 1.8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

## Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

#### **Class**

Cash and cash equivalents
Receivables from non-exchange transactions
Receivables from exchange transactions
Other financial assets
Other financial assets

#### Category

Financial asset measured at amortised cost Financial asset measured at fair value

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.8 Financial instruments (continued)

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

#### Class

Long term loan Trade and other payables Short term loan

#### Category

Financial liability measured at amortised cost Financial liability loans and receivables at amortised cost Financial liability measured at amortised cost

## Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

The municipality recognises financial assets using trade date accounting.

#### Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability, other than those subsequently measured at fair value, initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The municipality measures all other financial assets and financial liabilities initially at its fair value.

The municipality first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the municipality analyses a concessionary loan into its component parts and accounts for each component separately. The municipality accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

## Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest rate method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectability in the case of a financial asset.

## Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Annual Financial Statements for the year ended 30 June 2013

# Accounting Policies

#### 1.8 Financial instruments (continued)

Short-term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

#### **Gains and losses**

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

## Impairment and uncollectibility of financial assets

The municipality assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Where financial assets are impaired through use of an allowance account, the amount of the loss is recognised in surplus or deficit within operating expenses. When such financial assets are written off, the write off is made against the relevant allowance account. Subsequent recoveries of amounts previously written off are credited against operating expenses.

#### Derecognition

#### Financial assets

The municipality derecognises financial assets using trade date accounting.

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has
  transferred control of the asset to another party and the other party has the practical ability to sell the asset in its
  entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose
  additional restrictions on the transfer. In this case, the municipality:
  - derecognises the asset; and
  - recognises separately any rights and obligations created or retained in the transfer.

The carrying amount of the transferred asset is allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

## 1.8 Financial instruments (continued)

#### Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished - i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

#### 1.9 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are recognised separately as an expense in the period in which they are incurred.

#### **Operating leases - lessee**

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis over the lease term.

Any contingent rents are recognised separately as an expense in the period in which they are incurred.

#### 1.10 Inventories

Inventories are initially measured at cost except where inventories are acquired at no cost, or for a nominal cost, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.10 Inventories (continued)

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

#### 1.11 Non-current assets held for sale and disposal groups

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held for sale (or disposal group) are measured at the lower of its carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

## 1.12 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

## Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

The recoverable amount of a cash-generating asset or cash-generating unit is the higer of its fair value less cost to sell and its value in use.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.12 Impairment of cash-generating assets (continued)

#### Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

#### **Discount rate**

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

#### Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality uses management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are
  affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the municipality does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.12 Impairment of cash-generating assets (continued)

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

## Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

#### 1.13 Impairment of non-cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Non-cash-generating assets are assets other than cash-generating assets.

#### Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

The recoverable amount of a cash-generating asset or cash-generating unit is the higer of its fair value less cost to sell and its value in use.

Irrespective of whether there is any indication of impairment, the municipality also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.13 Impairment of non-cash-generating assets (continued)

#### Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

#### Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

## Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

## Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### 1.14 Employee benefits

## Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within 12 months after the end of the period in which the employees render the related service.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

## 1.14 Employee benefits (continued)

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the
  absences is due to be settled within twelve months after the end of the reporting period in which the employees
  render the related employee service:
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting
  period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered services to the municipality during a reporting period, the municipality recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the
  undiscounted amount of the benefits, the municipality recognises that excess as an asset (prepaid expense) to the
  extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measures the expected cost of accumulating compensated absences as the additional amount that the municipality expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the municipality has no realistic alternative but to make the payments.

## Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which the municipality provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

## Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the municipality recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the municipality recognises past service cost as an expense in the reporting period in which the plan is amended.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

## 1.14 Employee benefits (continued)

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly:
- plus any liability that may arise as a result of a minimum funding requirement.

The amount determined as a defined benefit liability may be negative (an asset). The municipality measures the resulting asset at the lower of:

- the amount determined above: and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future
  contributions to the plan. The present value of these economic benefits is determined using a discount rate which
  reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The municipality determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost:
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses, which is recognised immediately;
- past service cost, which is recognised immediately;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, the municipality attributes benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, the municipality attributes benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The municipality recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.14 Employee benefits (continued)

Before determining the effect of a curtailment or settlement, the municipality re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The municipality offsets an asset relating to one plan against a liability relating to another plan when the municipality has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

#### **Actuarial assumptions**

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money are consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
- those changes were enacted before the reporting date; or
- past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

#### Long-term service awards

The municipality has an obligation to provide long-term service allowance benefits to all of its employees. According to the rules of the long-term service allowance scheme, which the municipality instituted and operates, an employee (who is on the current conditions of service), is entitled to a cash allowance, calculated in terms of the rules of the scheme, after 10, 15, 20, 25 and 30 years of continued service.

The municipality's liability is based on an actuarial valuation. The Projected Unit Credit Method is used to value the liabilities. Actuarial gains and losses on the long-term service awards are recognised in the statement of financial performance.

The amount recognised as a liability for long-term service awards is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date:
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality recognises the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which is recognised immediately;
- past service cost, which is recognised immediately; and
- the effect of any curtailments or settlements.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

## 1.14 Employee benefits (continued)

#### **Termination benefits**

The municipality recognises termination benefits as a liability and an expense when the municipality is demonstrably committed to either:

- terminate the employment of an employee or group of employees before the normal retirement date; or
- provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

The municipality is demonstrably committed to a termination when the municipality has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

- the location, function, and approximate number of employees whose services are to be terminated;
- the termination benefits for each job classification or function; and
- the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than 12 months after the reporting date, they are discounted using an appropriate discount rate.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits is based on the number of employees expected to accept the offer.

#### 1.15 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating expenditure.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

## 1.15 Provisions and contingencies (continued)

A constructive obligation to restructure arises only when the municipality:

- has a detailed formal plan for the restructuring, identifying at least:
- the activity/operating unit or part of a activity/operating unit concerned;
- the principal locations affected;
- the location, function, and approximate number of employees who will be compensated for services being terminated:
- the expenditures that will be undertaken; and
- when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the municipality.

A contingent liability is:

- a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence
  or non-occurrence of one or more uncertain future events not wholly within the control of the municipality; or
- a present obligation that arises from past events but is not recognised because:
  - it is not probably that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation;
- the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 41.

### Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period;
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability
  exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the municipality tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy 1.12 and 1.13.
- changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
- a decrease in the liability is credited directly to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit; and
- an increase in the liability is recognised in surplus or deficit, except that it is debited directly to revaluation surplus in net assets to the extent of any credit balance existing in the revaluation surplus in respect of that asset;
- in the event that a decrease in the liability exceeds the carrying amount that would have been recognised had the
  asset been carried under the cost model, the excess is recognised immediately in surplus or deficit;
- a change in the liability is an indication that the asset may have to be revalued in order to ensure that the carrying
  amount does not differ materially from that which would be determined using fair value at the reporting date. Any
  such revaluation is taken into account in determining the amounts to be taken to surplus or deficit and net assets. If
  a revaluation is necessary, all assets of that class is revalued; and
- the Standard of GRAP on Presentation of Financial Statements requires disclosure on the face of the statement of
  changes in net assets of each item of revenue or expense that is recognised directly in net assets. In complying with
  this requirement, the change in the revaluation surplus arising from a change in the liability is separately identified
  and disclosed as such.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. This applies under both the cost model and the revaluation model.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.16 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

#### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

## Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality:
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

#### Interest

Interest is recognised, in surplus or deficit, using the effective interest rate method.

## 1.17 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by the municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, the municipality either receives value from another party without directly giving approximately equal value in exchange, or gives value to another party without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.17 Revenue from non-exchange transactions (continued)

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the municipality.

#### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met, a liability is recognised.

#### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

## **Transfers**

Apart from services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

## Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the municipality.

## Rates, including collection charges and penalties

Revenue from rates, including collection charges and penalty interest, is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the amount of the revenue can be measured reliably; and
- to the extent that there has been compliance with the relevant legal requirements.

Changes to property values during a reporting period are valued by a suitably qualified valuator and adjustments are made to rates revenue, based on a time proportion basis. Adjustments to rates revenue already recognised are processed or additional rates revenue is recognised.

#### Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.17 Revenue from non-exchange transactions (continued)

#### Services in-kind

Services in-kind are not recognised.

#### 1.18 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any
  investment income on the temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the municipality on funds generally borrowed for the purpose of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred

The capitalisation of borrowing costs commences when all the following conditions have been met:

- expenditures for the asset have been incurred;
- borrowing costs have been incurred; and
- activities that are necessary to prepare the asset for its intended use or sale are undertaken.

When the carrying amount or the expected ultimate cost of the qualifying asset exceeds its recoverable amount or recoverable service amount or net realisable value or replacement cost, the carrying amount is written down or written off in accordance with the accounting policy on Impairment of Assets as per accounting policy number 1.12 and 1.13. In certain circumstances, the amount of the write-down or write-off is written back in accordance with the same accounting policy.

Capitalisation is suspended during extended periods in which active development is interrupted.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

When the municipality completes the construction of a qualifying asset in parts and each part is capable of being used while construction continues on other parts, the entity ceases capitalising borrowing costs when it completes substantially all the activities necessary to prepare that part for its intended use or sale.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

#### 1.19 Value-Added Tax

The municipality applies the payment basis for VAT purposes as per Value-Added Tax Act. Output tax is payable as and when the purchase consideration are received and input will be claimed as and when payment is made. An apportionment percentage of 100% was used by the municipality from December 2012 (2012: 84.89% was used up to end of November 2012).

## 1.20 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year. Refer to note 46 for detail.

#### 1.21 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.22 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.23 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998), or is in contravention of the municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.24 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

#### 1.25 Grants in aid

The municipality transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the municipality does not:

- receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- expect to be repaid in future; or
- expect a financial return, as would be expected from an investment.

These transfers are recognised in the statement of financial performance as expenses in the period that the events giving rise to the transfer occurred.

### 1.26 Budget information

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2012/07/01 to 2013/06/30.

The annual financial statements and the budget are not on the same basis of accounting. The actual financial statement information is therefore presented on a comparable basis to the budget information. The comparison and the reconcilation between the statement of financial performance and the budget for the reporting period have been included in the statement of comparison of budget and actual amounts.

#### 1.27 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the local sphere of government are considered to be related parties.

Management is those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

Annual Financial Statements for the year ended 30 June 2013

# **Accounting Policies**

#### 1.28 Commitments

Items are classified as commitments where the municipality commits itself to future transactions that will normally result in the outflow of resources.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

## 1.29 Events after reporting date

Events after the reporting date that are classified as adjusting events have been accounted for in the annual financial statements. The events after the reporting date that are classified as non adjusting events after the reporting date have been disclosed in the notes to the annual financial statements.

Annual Financial Statements for the year ended 30 June 2013

# **Notes to the Annual Financial Statements**

Figures in Rand 2013 2012

#### 2. New standards and interpretations

#### 2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

## **GRAP 23: Revenue from Non-exchange Transactions**

Revenue from non-exchange transactions arises when the municipality receives value from another party without directly giving approximately equal value in exchange. An asset acquired through a non-exchange transaction shall initially be measured at its fair value as at the date of acquisition.

This revenue will be measured at the amount of increase in net assets recognised by the municipality.

An inflow of resources from a non-exchange transaction recognised as an asset shall be recognised as revenue, except to the extent that a liability is recognised for the same inflow. As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it will reduce the carrying amount of the liability recognised as recognise an amount equal to that reduction.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has adopted the standard for the first time in the 2013 annual financial statements.

The impact of the standard is not material.

#### **GRAP 24: Presentation of Budget Information in the Financial Statements**

Subject to the requirements of paragraph .19, the municipality shall present a comparison of the budget amounts for which it is held publicly accountable and actual amounts either as a separate additional financial statement or as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP. The comparison of budget and actual amounts shall present separately for each level of legislative oversight:

- the approved and final budget amounts;
- the actual amounts on a comparable basis; and
- by way of note disclosure, an explanation of material differences between the budget for which the municipality is held publicly accountable and actual amounts, unless such explanation is included in other public documents issued in conjunction with the financial statements, and a cross reference to those documents is made in the notes.

Where the municipality prepares its budget and annual financial statements on a comparable basis, it includes the comparison as an additional column in the primary annual financial statements. Where the budget and annual financial statements are not prepared on a comparable basis, a separate statement is prepared called the 'Statement of Comparison of Budget and Actual Amounts'. This statement compares the budget amounts with the amounts in the annual financial statements adjusted to be comparable to the budget.

A comparable basis means that the budget and annual financial statements:

- are prepared using the same basis of accounting i.e. either cash or accrual;
- include the same activities and entities;
- · use the same classification system; and
- are prepared for the same period.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has adopted the standard for the first time in the 2013 annual financial statements.

The adoption of this standard has not had a material impact on the results of the municipality, but has resulted in more disclosure than would have previously been provided in the annual financial statements.

#### **GRAP 103: Heritage Assets**

GRAP 103 defines heritage assets as assets which have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

A heritage asset should be recognised as an asset only if:

- it is probable that future economic benefits or service potential associated with the asset will to the municipality;
   and
- the cost of fair value of the asset can be measured reliably.

The standard requires judgement in applying the initial recognition criteria to the specific circumstances surrounding the municipality and the assets.

Where the municipality holds a heritage asset, but on initial recognition, it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in the notes to the financial statements.

GRAP 103 states that a heritage asset should be measured at its cost unless it is acquired through a non-exchange transaction which should then be measured at its fair value as at the date of acquisition.

In terms of the standard, the municipality has a choice between the cost and revaluation model as accounting policy for subsequent recognition and should apply the chosen policy to an entire class of heritage assets.

The cost model requires a class of heritage assets to be carried at its cost less any accumulated impairment losses.

The revaluation model required a class of heritage assets to be carried at its fair value at the date of the revaluation less any subsequent impairment losses. The standard also states that a restriction on the disposal of a heritage asset does not preclude the municipality from determining the fair value.

GRAP 103 states that a heritage asset should not be depreciated, but the municipality should assess at each reporting date whether there is an indication that it may be impaired.

For a transfer from heritage assets carried at a revalued amount to property, plant and equipment, investment property, inventories or intangible assets, the asset's deemed cost for subsequent accounting should be its revalued amount at the date of transfer. The municipality should treat any difference at that date between the carrying amount of the heritage asset and its fair value in the same way as a revaluation in accordance with this standard. If an item of property, plant and equipment or an intangible asset carried at a revalued amount, or investment property carried at fair value is reclassified as a heritage asset carried at a revalued amount, the municipality applies the applicable Standard of GRAP to that asset up to the date of change. The municipality treats any difference at that date between the carrying amount of the asset and its fair value in accordance with the applicable Standard of GRAP relating to that asset. For a transfer from investment property carried at fair value, or inventories to heritage assets at a revalued amount, any difference between the fair value of the asset at that date and its previous carrying amount should be recognised in surplus or deficit.

The carrying amount of a heritage asset should be derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset should be determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has adopted the standard for the first time in the 2013 annual financial statements.

The impact of the standard is set out in note 45 - Changes in accounting policy.

## **GRAP 21: Impairment of Non-cash-generating Assets**

Non-cash-generating assets are assets other than cash-generating assets.

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

The present value of the remaining service potential of a non-cash-generating asset is determined using one of the following approaches:

- Depreciated replacement cost approach;
- · Restoration cost approach; or
- Service units approach.

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has adopted the standard for the first time in the 2013 annual financial statements.

The impact of the standard is set out in note 45 - Changes in accounting policy.

#### **GRAP 26: Impairment of Cash-generating Assets**

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset. When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality uses management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable amount of that asset.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has adopted the standard for the first time in the 2013 annual financial statements.

The impact of the standard is set out in note 45 - Changes in Accounting Policy.

#### **GRAP 104: Financial Instruments**

The standard prescribes recognition, measurement, presentation and disclosure requirements for financial instruments. Financial instruments are defined as those contracts that result in a financial asset in one entity and a financial liability or residual interest in another entity. A key distinguishing factor between financial assets and financial liabilities and other assets and liabilities, is that they are settled in cash or by exchanging financial instruments rather than through the provision of goods or services.

In determining whether a financial instrument is a financial asset, financial liability or a residual interest, the municipality considers the substance of the contract and not just the legal form.

Financial assets and financial liabilities are initially recognised at fair value. Where the municipality subsequently measures financial assets and financial liabilities at amortised cost or cost, transactions costs are included in the cost of the asset or liability.

The transaction price usually equals the fair value at initial recognition, except in certain circumstances, for example, where interest free credit is granted or where credit is granted at a below market rate of interest.

Short-term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

Concessionary loans are loans either received by or granted to another entity on concessionary terms, e.g. at low interest rates and flexible repayment terms. On initial recognition, the fair value of a concessionary loan is the present value of the agreed contractual cash flows, discounted using a market related rate of interest for a similar transaction. The difference between the proceeds either received or paid and the present value of the contractual cash flows is accounted for as non-exchange revenue by the recipient of a concessionary loan in accordance with Standard of GRAP on Revenue from Non-exchange Revenue Transactions (Taxes and Transfers), and using the Framework for the Preparation and Presentation of Financial Statements (usually as an expense) by the grantor of the loan.

Financial assets and financial liabilities are subsequently measured either at fair value or, amortised cost or cost. The municipality measures a financial instrument at fair value if it is:

- a derivative
- a combined instrument designated at fair value, i.e. an instrument that includes a derivative and a non-derivative host contract;
- held-for-trading;
- a non-derivative instrument with fixed or determinable payments that is designated at initial recognition to be measured at fair value:
- an investment in a residual interest for which fair value can be measured reliably; and

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

· other instruments that do not meet the definition of financial instruments at amortised cost or cost.

Financial assets and financial liabilities that are non-derivative instruments with fixed or determinable payments, for example deposits with banks, receivables and payables, are measured at amortised cost. At initial recognition, the municipality can however designate such an instrument to be measured at fair value.

The municipality can only measure investments in residual interests at cost where the fair value of the interest cannot be determined reliably.

Once the municipality has classified a financial asset or a financial liability either at fair value or amortised cost or cost, it is only allowed to reclassify such instruments in limited instances.

The municipality derecognises a financial asset, or the specifically identified cash flows of an asset, when:

- the cash flows from the asset expire, are settled or waived;
- significant risks and rewards are transferred to another party; or
- despite having retained significant risks and rewards, the municipality has transferred control of the asset to another entity.

The municipality derecognises a financial liability when the obligation is extinguished. Exchanges of debt instruments between a borrower and a lender are treated as the extinguishment of an existing liability and the recognition of a new financial liability. Where the municipality modifies the term of an existing financial liability, it is also treated as the extinguishment of an existing liability and the recognition of a new liability.

The municipality cannot offset financial assets and financial liabilities in the statement of financial position unless a legal right of set-off exists, and the parties intend to settle on a net basis.

GRAP 104 requires extensive disclosures on the significance of financial instruments for the municipality's statement of financial position and statement of financial performance, as well as the nature and extent of the risks that the municipality is exposed to as a result of its annual financial statements. Some disclosures, for example the disclosure of fair values for instruments measured at amortised cost or cost and the preparation of a sensitivity analysis, are encouraged rather than required.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has adopted the standard for the first time in the 2013 annual financial statements.

The impact of the standard is set out in note 45 - Changes in accounting policy.

#### 2.2 Standards and Interpretations early adopted

The municipality has chosen to early adopt the following standards and interpretations:

## GRAP 1 (as revised 2012): Presentation of Financial Statements

Minor amendments were made to the statement of financial performance as well as the statement of changes in net assets.

All amendments are to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

The impact of the amendment is not material.

#### GRAP 3 (as revised 2012): Accounting Policies, Change in Accounting Estimates and Errors

Amendments were made to changes in accounting policies. A change to the cost model when a reliable measure of fair value is no longer available (or vice versa) for an asset that a Standard of GRAP would otherwise require or permit to be measured at fair value are no longer considered to be a change in an accounting policy in terms of the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors (as revised in 2010).

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

## 2. New standards and interpretations (continued)

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

The impact of the amendment is not material.

#### GRAP 7 (as revised 2012): Investments in Associates

Amendments were made to definitions. A requirement to include transaction costs on initial recognition of an investment in an associate under the equity method, has been included in the Standard of GRAP Investments in Associates

All amendments are to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

The impact of the amendment is not material.

## GRAP 9 (as revised 2012): Revenue from Exchange Transactions

Amendments were made to the scope and definitions.

All amendments are to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

The impact of the amendment is not material.

#### GRAP 12 (as revised 2012): Inventories

Amendments were made to measurement after recognition.

All amendments are to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

The impact of the amendment is not material.

## GRAP 13 (as revised 2012): Leases

Amendments were made to disclosures.

All amendments are to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

The impact of the amendment is not material.

#### GRAP 16 (as revised 2012): Investment Property

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

Amendments were made to definitions, measurement at recognition, disposals and disclosure. Changes were made to the Standard of GRAP on Investment Property (as revised in 2010) to ensure the consistent application of the principle where assets are acquired in exchange for non-monetary assets when the exchange transaction lacks commercial substance. Furthermore the assessment of significant use of an investment property has been clarified.

All amendments are to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

The impact of the amendment is not material.

#### GRAP 17 (as revised 2012): Property, Plant and Equipment

Amendments were made to definitions, measurement at recognition, disposals and disclosure. Changes were made to the Standard of GRAP on Property, Plant and Equipment (as revised in 2010) to ensure the consistent application of the principle where assets are acquired in exchange for non-monetary assets when the exchange transaction lacks commercial substance. Furthermore the requirement to disclose property, plant and equipment that were temporarily idle, has been clarified.

All amendments are to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

The impact of the amendment is not material.

#### GRAP 27 (as revised 2012): Agriculture (replaces GRAP 101)

This Standard of GRAP replaces the previous Standard of GRAP on Agriculture (GRAP 101) due to the International Public Sector Accounting Standards Board (IPSASB) that has issued an IPSAS on Agriculture (IPSAS 27).

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality has early adopted the standard for the first time in the 2013 annual financial statements.

The impact of the standard is not material.

## GRAP 31 (as revised 2012): Intangible Assets (replaces GRAP 102)

This Standard of GRAP replaces the previous Standard of GRAP on Intangible Assets (GRAP 102) due to the IPSASB that has issued an IPSAS on Intangible Assets (IPSAS 31).

Changes made comprise three areas that can be summarised as follows:

- consequential amendments arising from the alignment of the accounting treatment and text of GRAP 102 with that in IPSAS 31:
- the deletion of guidance and examples from interpretations issued by the International Accounting Standards Board (IASB) previously included in GRAP 102; and
- changes to ensure consistency between the Standards of GRAP, or to clarify existing principles.

All amendments are to be applied retrospectively.

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality has early adopted the standard for the first time in the 2013 annual financial statements.

The impact of the standard is not material.

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

#### **IGRAP 16: Intangible Assets - Website Costs**

The interpretation deals with the treatment of the municipality's own website. It concludes that the municipality's own website that arises from development and is for internal or external access is an internally generated intangible asset that is subject to the requirements of the Standard of GRAP on Intangible Assets.

A website arising from development will be recognised as an intangible asset if, and only if, in addition to complying with the general requirements described in the Standard of GRAP on Intangible Assets for recognition and initial measurement, the municipality can satisfy the requirements in paragraph 54 in the Standard of GRAP on Intangible Assets, which in particular requires the municipality to be able to demonstrate how its website will generate probable future economic benefits or service potential.

If the municipality is not able to demonstrate how a website developed solely or primarily for providing information about its own products and services will generate probable future economic benefits or service potential, all expenditure on developing such a website will be recognised as an expense when incurred.

A website that is recognised as an intangible asset under this interpretation will be measured after initial recognition by applying the requirements in the Standard of GRAP on Intangible Assets.

The effective date of the interpretation is for years beginning on or after 01 April 2013.

The municipality has early adopted the interpretation for the first time in the 2013 annual financial statements.

The impact of the interpretation is not material.

#### 2.3 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2013 or later periods:

#### **GRAP 25: Employee Benefits**

The objective of GRAP 25 is to prescribe the accounting and disclosure for employee benefits. The standard requires the municipality to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when the municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

The standard states the recognition, measurement and disclosure requirements of:

- short-term employee benefits;
  - all short-term employee benefits;
  - short-term compensated absences;
  - bonus, incentive and performance related payments;
- post-employment benefits: defined contribution plans;
- other long-term employee benefits; and
- termination benefits.

The major difference between this this standard (GRAP 25) and IAS 19 is with regards to the treatment of actuarial gains and losses and past service costs. This standard requires the municipality to recognise all actuarial gains and losses and past service costs immediately in the statement of financial performance once occurred.

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality expects to adopt the standard for the first time in the 2014 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

#### **GRAP 105: Transfers of Functions Between Entities Under Common Control**

The objective of this standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control.

A transfer of functions between entities under common control is a reorganisation and / or reallocation of functions between entities that are ultimately controlled by the same entity before and after a transfer of functions.

In the event of a transfer of functions between entities under common control, the assets and liabilities should be recognised (by the acquirer) at their carrying amounts and should be derecognised (by the transferor) at their carrying amounts.

The difference between amount of consideration paid or received, if any, and the carrying amounts of assets and liabilities should be recognised in accumulated surplus / (deficit).

Specific disclosures are required when there is a transfer of functions between entities under common control.

This standard has been approved by the Accounting Standards Board but its effective date has not yet been determined by the Minister of Finance.

The municipality expects to adopt the standard for the first time once it becomes effective.

The impact of the standard is currently being assessed.

#### **GRAP 106: Transfers of Functions Between Entities not Under Common Control**

The objective of this standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control.

A transfer of functions between entities not under common control is a reorganisation and / or reallocation of functions between entities that are not ultimately controlled by the same entity before and after a transfer of functions.

In the event of a transfer of functions between entities not under common control, the assets and liabilities should be recognised (by the acquirer) at their acquisition date fair values.

The difference between amount of consideration paid or received, if any, and the fair value of assets acquired and liabilities assumed should be recognised in accumulated surplus / (deficit).

For transfer of functions between entities not under common control there are some specific recognition and measurement principles and exceptions to the recognition and measurement principles.

Specific disclosures are required when there is a transfer of functions between entities not under common control.

This standard has been approved by the Accounting Standards Board but its effective date has not yet been determined by the Minister of Finance.

The municipality expects to adopt the standard for the first time once it becomed effective.

The impact of the standard is currently being assessed.

## **GRAP 107: Mergers**

The objective of this standard is to establish accounting principles for the combined entity and combining entities in a merger.

A merger is where a new combined entity is started, no acquirer can be identified and the combining entities do not have any control over the combined entity.

In the event of a merger, the assets and liabilities should be recognised (by the combined entity) at their carrying amounts and should be derecognised (by the combining entities) at their carrying amounts.

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

The difference between the carrying amounts of assets and liabilities should be recognised in accumulated surplus / (deficit).

Specific disclosures are required when there is a merger.

This standard has been approved by the Accounting Standards Board but its effective date has not yet been determined by the Minister of Finance.

The municipality expects to adopt the standard for the first time once it becomes effective.

The impact of the standard is currently being assessed.

#### **GRAP 20: Related Parties**

The objective of this standard is to ensure that the reporting entity's annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

The municipality (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between the municipality and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual annual financial statements.

The standard states that a related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard sets out the requirements, inter alia, for the disclosure of:

- control;
- · related party transactions; and
- remuneration of management.

Only transactions with related parties where the transactions are not concluded within normal normal operating procedures or on terms that are not no more or no less favourable than the terms it would use to conclude transactions with another entity or person are disclosed.

The standard requires that remuneration of management must be disclosed per person and in aggregate.

This standard has been approved by the Accounting Standards Board but its effective date has not yet been determined by the Minister of Finance.

The municipality expects to adopt the standard for the first time once it becomes effective.

The adoption of this standard is not expected to impact on the results of the municipality, but may result in more disclosure than is currently provided in the annual financial statements.

#### IGRAP 1 (as revised 2012): Applying the Probability Test on Initial Recognition of Revenue

This interpretation of the Standards of GRAP now addresses the manner in which the municipality applies the probability test on initial recognition of both:

- (a) exchange revenue in accordance with the Standard of GRAP on Revenue from Exchange Transactions; and
- (b) non-exchange revenue in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

This interpretation supersedes the interpretation of the Standards of GRAP: Applying the Probability Test on Initial Recognition of Exchange Revenue issued in 2009.

The effective date of the interpretation is for years beginning on or after 01 April 2013.

The municipality expects to adopt the interpretation for the first time in the 2014 annual financial statements.

The impact of this interpretation is currently being assessed.

#### 2.4 Standards and interpretations not yet effective or relevant

The following standards and interpretations have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2013 or later periods but are not relevant to its operations:

#### **GRAP 18: Segment Reporting**

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of the municipality that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by the municipality within a particular region.

This standard has been approved by the Accounting Standards Board but its effective date has not yet been determined by the Minister of Finance

The municipality expects to adopt the standard for the first time once it becomes effective.

The adoption of this standard is not expected to impact on the results of the municipality, but may result in more disclosure than is currently provided in the annual financial statements.

	(320 262 870)	(258 270 632)

#### Credit quality of receivables from exchange transactions

The credit quality of receivables from exchange transactions that are neither past nor due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information.

None of the financial assets that are fully performing have been re-negotiated in the last year.

#### Receivables from exchange transactions past due but not impaired

Receivables from exchange transactions which are less than 3 months past due are not considered to be impaired. At 30 June 2013, R 36 360 089 (2012: R 37 057 516) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	22 326 604	23 987 009
2 months past due	8 494 346	8 755 666
3 months past due	5 539 139	4 314 841

#### Receivables from exchange transactions impaired

As of 30 June 2013, receivables from exchange transactions of R 320 262 870 (2012: R 258 270 632) were impaired and provided for.

The amount of the allowance was R 61 992 238 as of 30 June 2013 (2012: R 67 180 319).

#### Credit quality of receivables from non-exchange transactions

The credit quality of receivables from non-exchange transactions that are neither past nor due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information.

None of the financial assets that are fully performing have been renegotiated in the last year.

#### Receivables from non-exchange transactions impaired

As of 30 June 2013, receivables from non-exchange transactions of R 59 217 016 (2012: R 65 627 638) were impaired and provided for.

The amount of the allowance was R (6 410 622) as of 30 June 2013 (2012: R 12 695 162).

The ageing of these receivables is as follows:

3 to 6 months	1 188 218	1 458 766
Over 6 months	58 028 798	64 168 872

#### Reconciliation of allowance for impairment of receivables from non-exchange transactions

#### 13. Landfill closure provision

#### Reconciliation of landfill closure provision - 2013

	Opening Balance	Additions	Total
Environmental rehabilitation	29 811 501	1 788 690	31 600 191

## Reconciliation of landfill closure provision - 2012

	Opening Balance	Additions	Total
Environmental rehabilitation	28 124 057	1 687 444	29 811 501

#### Provision for landfill closure:

The municipality engages in waste disposal operations from residential and business areas within the following areas:

- Deneysville
- Oranjeville
- Sasolburg

The 2011 and 2012 costs were calculated based on the present year rehabilitation costs and a discount rate of 6%.

In terms of licensing of the landfill refuse sites, the municipality will incur licensing and rehabiltion costs to restore the site at the end of its useful life. The landfill sites are not licensed and the municipality could incur penalties for not being licensed.

## 14. Employee benefits obligation

## Reconciliation of employee benefits obligation - 2013

	Opening Balance	Additions	Total
Employee benefit cost medical	28 488 169	1 925 846	30 414 015

#### **Continue Medical aid membership**

Metsimaholo Municipality employees contribute to accredited medical schemes.

The Municipality offers employees and continuation members the opportunity of belonging to one of several medical aid schemes, most of which offer a range of options pertaining to levels of cover.

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

Figures in Rand	2013	2012

#### 14. Employee benefits obligation (continued)

Upon retirement, an employee may continue membership of the medical scheme. Upon a member's death-in-service or death-in-retirement, the surviving dependants may continue membership of the medical scheme.

Members contribute according to tables of contribution rates which differentiate between them on the type and number of dependants. Some options also differentiate on the basis of income.

In-service members that were employed prior to 2001 are entitled to a post-employment medical aid subsidy of 60% of the contribution payable. All current continuation members receive a 60% subsidy.

Upon a member's death-in-service or death-in-retirement, the surviving dependants will continue to receive the same 60% subsidy.

The obligation in respect of medical care contributions for retirement benefits is valued every year by independent qualified actuaries.

An actuarial valuation has been performed of the municipality's liability in respect of benefits to eligible retirees and retired employees of the municipality. The provision is utilised when eligible employees receive the value of the vested benefits.

**Accrued Liability** 

The Projected Unit Credit Method has been used to value the liabilities.

Category of member		
In-service members	12 697 000	11 712 000
Continuation members	17 717 000	16 776 000
All members		
Total liability	30 414 000	28 488 000
Value of asset	<u> </u>	
Unfunded liability	30 414 000	28 488 000

Liabilities and experience adjustment made. The table summarises the accrued liabilities and the plan assets for the current period and the previous period.

## **Notes to the Annual Financial Statements**

Figures in Rand	2013	2012
Figures in Rand	2013	2012

## 14. Employee benefits obligation (continued)

## Key financial assumptions

The table summarised the financial assumption used.

Assumption	Value p.a
Discount rate	8.23%
Health care cost inflation rate	7.62%
Non effective discount rate	0.56%

The next contribution rate increase is assumed to occur at 1 January 2014.

Average retirement age Continuation of membership at retirement Proportion assumed married at retirement Mortality during employment Mortality post-retirement	65 70% 70% SA 85-90 PA 90-1 ultimate		
Withdrawal from service (sample annual rates)	Age 20 30 40 50 >55	Females 24% 15% 6% 2% 0%	Males 16% 10% 6% 2% 0%
Number of in service members Number of pensioners		76 54	

## Summarises the results of the sensitivity analysis.

**Accrued liability** 

Sensitivity analysis on the accrued liability (R Millions)

Sensitivity analysis on the a	accrued nability (	K WIIIIONS)			
Assumption	Change	In-service	Continuation	Total	% change
Central assumptions		12.697	17.717	30.414	
Health care inflation	1%	15.435	19.356	34.791	14
	-1%	10.530	16.280	26.810	(12)
Post-retirement mortality	-1 yr	13.172	18.544	31.716	4
Average retirement age	-1 yr	13.468	17.717	31.186	3
Withdrawal Rate	-50%	13.473	17.717	31.191	3

Note: The post-retirement mortality adjustment assumes that someone aged 70 will experience the mortality of someone aged 69. The liability is expected to increase under this scenario because members are expected to live longer.

The table above indicates, for example, that if medical inflation is 1% greater than the long-term assumption made, the liability will be 14% higher than that shown.

Long term service awards Balance at beginning of year Current-service cost Interest cost Actuarial (Gain)/Loss Employer Benefit Payments Balance at end of year	12 446 589 1 582 568 641 119 2 264 553 (1 835 332) 15 099 497	11 776 539 1 491 731 677 601 322 230 (1 821 512) 12 446 589

Current service cost	1 431 218	
Interest cost	814 454	
Benefit vestings	(1 866 023)	
Total annual expense		
Closing accrued Liability	15 479 146	

## Long service awards

An actuarial valuation has been performed of the municipality's liability in respect of benefits to eligible employees of the municipality. The provision is utilised when eligible employees receive the value of the vested benefits.

	Female	Male	Total
Number of eligible employees	203	479	682
Average annual salary	140 824	134 088	136 093
Salary-weighted average age	43.3	45.2	44.6
Salary-weighted average past service	11.7	13.4	12.9

Metsimaholo Local Municipality offers employees long service awards for every 5 years of services completed. There is two policies in place.

Completed service (in years)	Long service bonuses % annual salary	Description
5	4.0%	(5/250 + 2%) x annual salary
10	7.0%	(10/250 + 3%) x annual salary
15	10.0%	(15/250 + 4%) x annual salary
20	11.0%	(15/250 + 5%) x annual salary
25,30,35,40,45	12.0%	(15/250 + 6%) x annual salary

## 682 Employees benefit from this policy

## Special leave pay

73 of the employees receive an additional six days of annual leave once they reach their five years of service.

#### Retirement gifts

252 employees are entitled to receive a retirement gift of 2% of annual salary at retirement. Employees must have at least 20 years of service to be eligible for the benefit.

The Projected Unit Credit Method has been used to value the liabilities.

## **Key Financial Assumptions**

The table summarised the financial assumptions used.

Assumptions	Value p.a
Discount Rate	5.87%
General salary inflation rate (long term)	5.59%
Non effective discount rate	0.27%

The salaries used in the valuation include an assumed increase on 1 July 2013 of 6.84%. The next salary increase was assumed to take place in July 2014.

Average retirement age	65
Mortality during employment	SA 85-90

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

Figures in Rand			2013	2012
14. Employee benefits obligation (continued)				
Withdrawal from service (sample annual rates)		Age 20 30 40 50 >55	Females 24% 15% 6% 2% 0%	Males 16% 10% 6% 2% 0%

Withdrawal rates	-50%	17.091	13%	

The table above indicates, for example, that if salary inflation is 1% greater than the long-term assumption made, the liability will be 7% higher than that shown.

## 15. Long term loan

Development Bank of Southern Africa Limited - Non-current portion	8 017 077	<u>-</u>
Development Bank of Southern Africa Limited - Current portion	982 923	-

## Terms and conditions

The orginal loan amount consist of R19,000,000 but only R9,000,000 was disbursed as at 30 June 2013.

The interest on the loan is fixed at 8.67% with capitalisation every 6 months but will be 10.67% on arrear amounts.

The interest and capital repayment every 6 months in equal instalments of R871,356 over 7 years, in total 14 instalments.

The loan is unsecured but the application of the loan is conditional to specific projects.

## 16. Finance lease obligation

Minimum lease payments due - within one year	13 200 680	9 759 669
less: future finance charges	13 200 680 (684 104)	9 759 669 (550 327)
Present value of minimum lease payments	12 516 576	9 209 342
Present value of minimum lease payments due - within one year	12 516 576	9 209 342

It is Metsimaholo local municipality's policy to lease certain equipment under finance leases.

The average lease term is 2-5 years and the average effective borrowing rate is 9.94% (2012: 11.91%).

Interest rates are fixed at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

The original contract would have ended on 30 January 2013 but because of payments in arrear the contract's repayments terms were changed and extended. The debt repayment will be repaid in 16 monthly instalments of R1,254,065 that commenced in March 2013 and the last payment will be made in June 2014.

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets. Refer note 4.

## 21. Short term loan

Infrastructure Finance Corporation Limited

6 436 878

At amortised

**Total** 

#### Terms and conditions

The debt of R10,375,661 will be payable in 17 equal instalments of R610,333 on the 7th of each month with the last instalment payable on 7 May 2014 in full and final settement of the capital amount and interest of INCA's claim against Metsimaholo Local Municipality. In the current year 6 instalments have already been made and the balance will be settled in the next financial year. Interest were charged at prime rate of 8.5%.

Instalment not paid on due date shall attract penalty interest at the rate equals to the higher of 15% or prime plus 3% per annum.

The loan resulted from rental agreements with Konica Minolta that were financed by Infrastructure Finance Corporation Limited on behalf of the Metsimaholo Local Municipality when instalments on the rental agreements went into arrears.

5 year: Tax Holiday	37 556	65 206
	14 070 593	13 855 249

Valuations on which property rates are based are performed every four years. The last general valuation came into effect on 1 July 2008. Interim valuations are processed on a monthly basis to take into account changes in individual property values due to alterations and subdivisions.

Rebates for 2012/13 was up to R85 000 on value of property are granted to residential and state property owners. Rates are levied on a monthly basis, except farmland that is levied on an annual basis.

Interest at prime plus 1% is levied on rates outstanding after due date for payment.

The phase in approach to tax private development and agricultural land was approved for 3 years ending June 2011, in line with the COGTA regulations issued in December 2007.

The following properties are exempted from property rates:

- Properties owned by a religious body or organisation and residential property occupied by a minister of religion in full time of service of such a church.
- Road reserves
- Railway reserves

The new general valuation will be implemented on 1 July 2013.

Conditional grants received	71 054 890	44 229 992
Unconditional grants received	93 903 138	88 125 000
	164 958 028	132 354 992

## **Equitable share**

Equitable share was received in terms of section 214(1) of the Constitution (Act No. 108 of 1996). An amount of R3,749,863 were withheld because of Department of Electricity not utilising all there funds in prior years.

A Council Resolution was taken to use some of the grant for free basic services to residents.

Households receive 6kl water, 50 kWh electricity and basic sewer per month plus 4kl water, additional sewer, refuse and R60 per month on Rates to approved indigents.

## **Municipal System Improvement Grant**

Current-year receipts Conditions met - transferred to revenue	800 000 (800 000)	790 000 (790 000)
	-	-

To assist municipalities in building in-house capacity to perform their functions and stabilise institutional and governance systems.

## **Financial Management Grant**

Annual Financial Statements for the year ended 30 June 2013

## **Notes to the Annual Financial Statements**

Figures in Pand	2013	2012
Figures in Rand	2013	2012

## 26. Government grants and subsidies (continued)

The Municipality received funds from Sector Education Training Authority for excellence performance by human resources division. The funds must be utilised towards training and the appointment in appointing service providers to provide training were slow.

#### **Provincial Government**

Balance unspent at beginning of year

694 895

694 895

Funds for waterworks at laboratory. Funds for development programs. Funds received from Housing award to purchase computers.

## Changes in level of government grants

Based on the allocations set out in the Division of Revenue Act, (Act 53 of 2000), no significant changes in the level of government grant funding are expected over the forthcoming 3 financial years.

## 27. Other income

#### SALGA Wage Curve Agreement

As a result of the uncertainties arising from the dispute declared by the unions and the pending litigation regarding the wage curve agreement, the municipality may have an additional receivable/ payable for employee wages, depending on the outcome of the pending litigation. It is not practicable to reliably estimate the amount of this receivable/ payable prior to the outcome of the pending litigation.

#### 43. Change in estimate

#### Property, plant and equipment

The useful life of all property, plant and equipment items in the asset register on 1 July 2012 was extended with 3 years. The effect of this revision has decreased the depreciation charges for the current and future periods by R 18 497 278.

#### 44. Prior period errors

The prior year has been amended to account for prior period erorrs.

Below is a description of each incividual prior error followed by a summary of the total effect of the prior period errors on the amounts previously disclosed.

### **Metsimaholo Local Municipality**

Annual Financial Statements for the year ended 30 June 2013

#### **Notes to the Annual Financial Statements**

Figures in Pand	2013	2012
Figures in Rand	2013	2012

#### 44. Prior period errors (continued)

#### 1. Provision for landfill closure

Item were not accounted for as provision prior to the 2011/2012 reporting period.

The effect of this adjustment on the prior year is as follows:

Adjustment against opening Accumulated Surplus 1 July 2011	28 124 058
Adjustments affecting the statement of financial position	
Increase in landfill closure provision	(29 811 502)
	(29 811 502)
Adjustments affecting the statement of financial performance	
Increase in general expenses	1 687 444

#### 2. Expenses not accrued in prior years

Some general expenses, repairs and maintenance, employee cost, service charges and bulk purchases were incorrectly accrued in 2010/2011 and 2011/2012 years. These have been corrected and the 2011/2012 amounts restated accordingly.

The effect of this adjustment on the prior year is as follows:

transactions (5 406 061  Adjustments affecting the statement of financial performance Increase in general expenses 433 198 Increase in repairs and maintenance 11 760 Decrease in other income 278 329 Increase in personnel costs 560 826 Decrease in service charges 1739 808 Increase in finance charges 305	Adjustment against opening Accumulated Surplus 1 July 2011	2 381 835

Annual Financial Statements for the year ended 30 June 2013

#### **Notes to the Annual Financial Statements**

Figures in Bond	2013	2012
Figures in Rand	2013	2012

#### 45. Changes in accounting policy

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice on a basis consistent with the prior year except for the adoption of the following new or revised standards. All changes resulting from the application of these Standards of GRAP were accounted for retrospectively.

- GRAP 23: Revenue from Non-exchange Transactions
- GRAP 24: Presentation of Budget Information in Financial Statements
- GRAP 103: Heritage Assets
- GRAP 21: Impairment of Non-cash-generating Assets
- GRAP 26: Impairment of Cash-generating Assets
- GRAP 104: Financial Instruments
- GRAP 1 (as revised ;22012): Presentation of Financial Statements
- GRAP 3 (as revised 2012): Accounting Policies, Change in Accounting Estimates and Errors
- GRAP 9 (as revised 2012): Revenue from Exchange Transactions
- GRAP 12 (as revised 2012): Inventories
- GRAP 13 (as revised 2012): Leases
- GRAP 16 (as revised 2012): Investment Property
- GRAP 17 (as revised 2012): Property, plant and Equipment
- GRAP 31 (as revised 2012): Intangible Assets
- IGRAP 16: Intangible Assets Website Costs

The aggregate effect of the changes in accounting policy on the annual financial statements for the year ended 30 June 2012 is disclosed in notes 43 and 46.

#### 46. Comparative figures

Certain comparative figures have been reclassified.

The reasons for reclassification is to classify other income items in correct other income votes.

The effects of the reclassification are as follows:

#### **Statement of Financial Performance**

Decrease electricity residential/Increase building plan fees	-	1 618
Decrease selling of plans/Increase building plan fees	-	781
Decrease prepaid electricity/Increase building plan fees	-	50
Decrease fines and penalties/Increase building plan fees	-	100
Decrease valuation certificates/Increase building plan fees	-	606
Decrease tender deposits/Increase building plan fees	-	500
Decrease sales refuse bags/Increase building plan fees	-	29
Decrease connection fees/Increase building plan fees	-	1 846
Decrease entrance fees Abrahamsrust/Increase building plan fees	-	789
Decrease rental council properties/Increase building plan fees	-	894
Decrease building plan fees/Increase connection fees	-	368
Decrease telephone costs/Increase private telephone	-	257 216
Decrease sales copies/Increase profit on the sale of asset	-	40 881
Decrease sales copies/Increase prepaid electricity	-	9 620
Decrease sales copies/Increase insurance aggregate	-	227 542
Decrease sales copies/Increase maintenance vechiles	-	29 605

#### 47. Risk management

#### Financial risk management

The municipality's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (e.g. fair value interest rate risk, cash flow interest rate risk and price risk).

### **Metsimaholo Local Municipality**

Annual Financial Statements for the year ended 30 June 2013

#### **Notes to the Annual Financial Statements**

Figures in Rand	2013	2012

#### 47. Risk management (continued)

#### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

At 30 June 2013	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Finance lease obligations	12 516 576	-	-	-
Payables from exchange transactions	132 912 373	-	-	-
Consumer deposits	12 170 254	-	-	-
At 30 June 2012	Less than 1	Between 1	Between 2	Over 5 years
	year	and 2 years	and 5 years	
Finance lease obligations	9 209 342	-	-	-
Payables from exchange transactions	120 171 197	-	-	-
Consumer deposits	10 647 537	-	-	-

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents and receivables. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2013	2012
Receivables from exchange transactions	81 117 221	75 077 548
Receivables from non-exchange transactions	28 252 097	28 997 521
Cash and cash equivalents	9 184 281	7 675 888
Other financial assets	14 288 338	17 801 505

#### Interest rate risk

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

#### 48. Going concern

We draw attention to the fact that at 30 June 2013, the municipality had accumulated surplus of R 844 737 348 and that the municipality's total assets exceed its liabilities by R 844 737 348.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern and will continue in operation and meet it statatory obligations for the foreseable future, due to the fact that the municipality has the power to levy Rates and Taxes. There is also the multi-gear funding agreements through the Division of Revenue Act from National Treasury. The municipality will also embark on a community campains to encourage payment of services.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

#### **Notes to the Annual Financial Statements**

Figures in Rand	2013	2012
Figures in Rand	2013	2012

#### 49. Events after the reporting date

The accounting officer is not aware of any matter or event arising since the end of the reporting period and the date of this report, which will significantly affect the financial position and results of the municipality's operations.

#### 50. Unauthorised expenditure

Approval by Council or Condoned	(5 034 682)	(625 581)
Opening balance Unauthorised expenditure - current year	89 298 130 7 202 566	83 749 949 6 173 762

Msimanga M (Acc no 556692)	-	19 340	19 340
Nthebe MD (Acc no 104154)	-	73 369	73 369
	-	118 927	118 927

During the year the following Councillors' had arrear accounts outstanding for more than 90 days.

#### Supply chain management regulations

In terms of section 36 of the Municipal Supply Chain Management Regulations any deviation from the Supply Chain Management Policy needs to be approved / condoned by the City Manager and noted by Council. The expenses (includes VAT) incurred as listed hereunder.

#### Incident

Quotations received outside the official procurement processes

3 956 448 27 373 411

The general reasons for deviations were strip and quote for motor vehicles, emergency, sole suppliers and urgency on the expenditure.

#### 54. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

## Metsimaholo Local Municipality Annual Financial Statements for the year ended 30 June 2013

#### **Notes to the Annual Financial Statements**

Figures in Rand	2013	2012

#### 54. Deviation from supply chain management regulations (continued)

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

#### 55. Budget differences

#### Material differences between budget and actual amounts

- 1. Service charges Electricity sales that were less than the budget, only 77.5% of budget.
- 2. Rental of facilities and equipment The budget was not met on the rental of facilities at the recreational facilities.
- 3. Interest trading The budget exceeded, more consumers were in arrears than anticipated.
- 4. Licences and permits The budget on public vehicle licences and street trading licences were more than actual receipts.
- 5. Fines Traffic fines were budgeted for R12 million and only R4 million was collected.
- 6. Investments interest The interest earned on Sanlam contributer that the budget was exceeded.
- 7. Property rates Property rates levied exceede the budget.
- 8. Government grants All the grants ere received as per budget.
- 9. Personnel The salary budget was not spent fully as problems were experienced with appointment of staff.
- 10. Remuneration of councillors 94% of budget was incured.
- 11. Depreciation A change of estimate contribution that only 57% of budget was allocated.
- 12. Finance Cost The total loan of DBSA was not taken up as projected in the budget only R9 million was disbursed.
- 13. Debt impairment The actual lower payment rate as the budget assumption contribute to the increase in actual debt impairment.
- 14. Repairs and maintenance The actual expenditure versus budget is 44% and is a result of cash flow problems experienced.
- 15. Bulk purchases 93% of the budget was spend.
- 16. Contracted services The budget was 100% spend.
- 17. Grants and subsidies The actual albations is 98% of the budget.
- 18. General expenditure The projection as per budget was not met due to operational matters.
- 19. Profit on sale of assets R9 million was budgeted for sale of land but the implementation of the selling of land is still in process.

#### Differences between budget and actual amounts basis of preparation and presentation

The budget is approved on a accrual basis by functional classification. The approved budget covers the period from 1 July 2012 to 30 June 2013. The financial statements are prepared on the accrual basis using a classification on the nature of expenses in the statement of financial performance. The financial statements basis agree to budget basis, no differences.

#### Changes from the approved budget to the final budget

The changes between the approved and final budget are a consequence of reallocations within the approved budget parameters.
